

Product Data Sheet

Momento Silverline™

Product name: Momento Silverline™
Function: Emulsion concentrate for the Momento Silverline™ coating of machine operated sockets.

Momento Silverline™ is based on a dark brown mineral oil and additives which is mixed with water to form a milky white emulsion. The oil in the emulsion penetrates the surface and provides the product with a well-protected layer against rust and creates a shiny silver coating.

Usage: Only for industrial or professional use.

Classification of the substance or mixture

Classification entries: Product is not classified as hazardous according to KIFS 2005:7, KIFS 2008:2 to *EU Directive and its regulations and the European Parliament and of the council and its changer*.

Classification under CLP: Classification according to Directive 67/548/EU and 1999/45/EU.

Composition / Information on ingredient

Substance:

Alcohols, C16-18 (even numbered) and C18 unsaturated, ethocylated < 2,5 EO,
CAS-No: 68920-66-1, EC-list No: 500-236-9

Classification: Xi; R36/37/38 , < 5-10 weight%

Mineral oil

Additives

Emulsifiers

The product is free from chlorine, PCBs and PCTs.

Ecological information

Ecotoxicity: There is no data on the ecotoxicity of this product.

Aquatic comment: There is no information on the product itself. Avoid discharge into waterways, soil and sewage.
